

Bug Fixes & UI Corrections

Batch 5 | Auto Repair Shop Management System | April 2026

This document contains 9 fixes across 3 files. Each fix includes a description, the exact file to modify, and a reference screenshot showing the current state or target.

#	File	Summary
1	offers/edit/page.tsx	Show both offer number AND service card number in header, labeled
2	warehouse/page.tsx	Add sort options; default sort = newest date first
3	warehouse/page.tsx	Replace simple ←/→ pagination with full numbered component
4	warehouse/page.tsx	Pagination footer text: "X ■■ Y ■■ Z ■■■■■■" (not ■■■■■■)
5	create-offer/page.tsx	Manufacturer not auto-filling from warehouse for non-Mercedes parts
6	earnings/page.tsx	Georgi's earnings panel layout broken/compressed — fix to match Lyubo's
7	earnings/page.tsx	Add "■■■■■ (€)" field after ■■■■■■, affects ■ ■■■■ calc
8	earnings/page.tsx	Bonus row in PDF only when value is filled
9	earnings/page.tsx	Bonus row in PDF: bold, same style as ■■■■■■, positioned below it

Fix #1 — Offer Edit Header — Show Both Numbers

offers/edit/page.tsx

The header currently shows only the offer number. When a service card has been created from the offer, the header still shows only the offer number — the service card number is invisible.

Fix: Display both numbers with clear labels:

- ■■■■■■ ■3106113538
- ■■■■■■■■ ■■■■■ ■XXXXXXXXXX

If no service card exists yet — show only the offer number (current behavior). Find the service card by querying for a record linked to this offer's ID.

■ Labels must make clear which number is which — do not display raw numbers without context.

Редактиране на оферта №3106113538

@offer/editpage.jsx

Гарантов номер е голям брой от офертата, обичайно номер на офертата, а когато е създадена сервисна карта пак стои номер на офертата, а не на сервисната карта. Добила и глобалния номер и да пише код на който е

Current state: header shows only offer number. Fix: add service card number below/alongside with labels.

Fix #2 — Warehouse — Add Sort Options

warehouse/page.tsx

The warehouse list has no sort controls. The offers list has Status /   /   sort buttons. Add the same pattern to the warehouse page.

Fix:

- Sortable columns: Date (■■■■■), Status (■■■■■■■), Sale Price (■■■■■■■■■ ■■■■).
- Default sort: newest date first (created_at DESC).
- Reuse the exact sort UI component from the offers list — do not build a new one.

Показване на 1 до 16 от 77 оферти

И текста отговори само че въпреки оферти да бъде част

Top: current warehouse simple pagination (← 2/3 →) to replace. Bottom: target pagination style from offers list —  | 1 | 2 | ... | 5 | . Footer text must say "5 items" not "5 pages".

Fix #5 — Create Offer — Manufacturer Not Auto-filling (Non-Mercedes)

[create-offer/page.tsx](#) → [PartsFieldArray.tsx](#)

When selecting a part from the warehouse dropdown inside AddEditPartModal, the Manufacturer field only populates correctly for MERCEDES parts. For any other brand (e.g. FÖRCH), the field does not update — it stays as MERCEDES or stays empty.

Root cause: The auto-fill logic likely hardcodes manufacturer = 'MERCEDES' or skips setting it. It must use match.manufacturer from the selected warehouse record.

Fix: On warehouse part selection, set manufacturer field = match.manufacturer (the actual stored value). Must work for ALL manufacturers.

■ **Verify by selecting a FÖRCH part from warehouse — manufacturer field must show FÖRCH, not MERCEDES.**

Current bug: part 61100914 is stored in warehouse as manufacturer FÖRCH, but the Manufacturer field shows MERCEDES after auto-fill. Fix: show the actual warehouse value.

Fix #6 — Earnings — Georgi's Panel Layout Broken

[earnings/page.tsx](#)

Georgi Mihailov's earnings panel has compressed/broken column widths. The hours column is squashed and the overall layout differs from Lyubo Kirov's panel which renders correctly. Both mechanics must have identical layout.

Fix: Make Georgi's panel layout identical to Lyubo's. Column widths must be fixed/constrained — not content-driven. Likely caused by longer car model names or repair descriptions pushing column widths.

Във PDF-а да се появява под Карта, текстово "Бонус КЧ" и сумата да бъде изчислен износът в Карта само, че да бъде удебелен

Reference: current earnings panel and PDF. Add "██████ (€)" field after ██████ in the UI. In the PDF, the ██████ row appears below ██████, same style but bold, only when value is filled.

Pre-Completion Checklist

- #1: Header shows ■■■■■■ ■X AND ■■■■■■■■ ■■■■■■ ■Y with labels; single offer (no card) shows only offer number
- #2: Warehouse sort controls added; default sort is newest date first (created_at DESC)
- #3: Full numbered pagination in warehouse matches offers pagination exactly
- #4: Pagination footer says "■■■■■" not "■■■■■■■"
- #5: Selecting a non-Mercedes warehouse part sets Manufacturer to the actual stored value (e.g. FÖRCH)
- #6: Georgi's earnings panel layout matches Lyubo's — column widths fixed, not content-driven
- #7: "■■■■■ (€)" field exists after "■■■■■ (€)" and ■ ■■■■■ updates live when changed
- #8: Bonus row absent from PDF when bonus is 0 or empty
- #9: Bonus row in PDF is bold, positioned below ■■■■■■, same font/size as ■■■■■■ row
